

# FIG 1

This diagram shows a cross-sectional view of a second embodiment of the device. It features a central cavity with a top surface and a bottom surface. The top surface is defined by a horizontal layer (25) and a vertical wall (26). The bottom surface is defined by a horizontal layer (25) and a vertical wall (26). The vertical walls (26) are shown with a hatched pattern, indicating they are solid components. The horizontal layers (25) are shown with a solid pattern, indicating they are also solid components. The central cavity is formed by the intersection of these layers and walls.
